PROFILE

As a motivated Java developer with a solid understanding of object-oriented programming and core Java principles, I bring enthusiasm and a willingness to learn to every project. My academic background includes hands-on experience with Java frameworks and tools, and I am eager to contribute to innovative software solutions. Ready to leverage my skills and grow in a dynamic development environment.

PROJECT

Online Kart

- Developed the Online Kart CRUD application using Spring Boot, Java, and PostgreSQL, implementing robust back-end services and data management.
- Designed RESTful APIs for product, user, and order management, integrating Spring Security for user authentication and role-based access.
- Configured PostgreSQL database schemas and optimized data storage with relational integrity.
- Deployed and tested the application, ensuring reliability through comprehensive error handling and API testing with Postman.

INTERNSHIP

Adhiya Finance Android Application

- Developed User Authentication: Implemented a secure login screen for the Adhiya Finance Android application, enhancing user experience through intuitive design and efficient authentication processes.
- Designed User Interface: Created and organized menu items to facilitate easy navigation within the app, contributing to improved usability and accessibility for end users.
- Integrated RESTful API: Successfully fetched and displayed user data from a RESTful API, ensuring real-time data synchronization and enhancing the app's functionality and responsiveness.
